2012 Michigan Garden Plant Tour

7/30/2012 - 8/10/2012

Michigan

The Michigan Garden Plant Tour is an annual, coordinated open house of leading young plant producers of ornamentals and Michigan State University. Greenhouse growers, landscapers, garden center operators, and nurserymen are invited to visit each of these participating Tour sites during the two-week period. As we enter 2012, please check back on the Tour website for more information on the 2012 Tour, including highlights of each site, hours, location, and contact information.

Expect to see impressive displays of flowering plant material, including all of the commercial brands of annuals, perennials, and shrubs. This is a terrific way to observe plant performance at different locations and grown under various conditions, both in the ground and in containers.
