International HortiCongress

10/30/2012 - 10/30/2012

The Netherlands, Amsterdam, Amsterdam RAI

Horticulture realizes solutions for global challenges like food scarcity, clean energy, water, health and well-being. The people attending the International HortiCongress are top entrepreneurs, CEOs, CTOs, scientists, policymakers, politicians, NGOs and governmental authorities. They see a role for themselves and for their companies or spheres of activity in finding (partial) solutions for global issues. They realize that crossovers with other sectors create impulses and inspiration.

International Horti Fair, October 30- November 2, Amsterdam RAI
