ONLA Greenhouse Production Short Course

6/20/2012 - 6/21/2012

OSU-OKC Horticulture Center, Oklahoma City, Oklahoma

The Greenhouse Production Short Course is designed to educate and inspire all who work in greenhouses or hoopouses with ornamental and edible plant materials. ONLA has brought together an impressive panel of experts to share their experiences and knowledge. Additionally, OSU-OKC is opening its doors and facilities, which gives the Short Course an opportunity to share in hands-on demonstrations and tours. The trial gardens on campus include many of Ball Horticulture's varieties, which is fitting with Jim Nau of Ball Horticulture as the keynote speaker. And the first day of the Short Course includes a field trip to TLC Florist and Greenhouses' Memorial Road location. Where you will enjoy dinner, generously sponsored by BWI Companies, and participate in discussions and tours, led by members of the TLC staff.
