

Greenhouse Crop Production & Engineering Design Short Course

3/22/2015 - 3/27/2015

Westward Look Resort, Tucson, Arizona

This annual short course led by the University of Arizona Controlled Environment Agriculture Center (CEAC) offers three full days of lectures on the many aspects of controlled environment agriculture (CEA) and one full day of hands-on workshops on the campus of the CEAC. The exhibitor room allows course attendees to meet with industry professionals and discuss their current operation or future projects. The short course is also a one-of-a-kind networking event. If you cannot make it to Tucson for the short course, consider the webcast attendance option. Fee: \$795 before Feb. 20; \$365 for webcast.
