MICHIGAN STATE UNIVERSITY EXTENSION

Michigan State University Biological Control Short Course

8/21/2018 - 8/21/2018

Great Lakes Greenhouse, Kalamazoo, Michigan

This course places special emphasis on controlling pests in spring floriculture crops and features several sessions with Graeme Murphy: a conversation on the economics of biocontrol, a pest management planning exercise, and a Q&A panel of IPM specialists. The curriculum has been designed for flexibility on discussion topics and the on-site greenhouse location provides the opportunity for demonstrations and hands-on activities.
