Ball Publishing Webinar: Beneficial Nematodes: Where Are We?

12/13/2018 - 12/13/2018

1:00 p.m. EST/12:00 p.m. CST

The next GrowerTalks webinar will feature the one and only Suzanne "Buglady" Wainwright waxing poetic on one of her favorite topics: beneficial nematodes. She'll be joined by Julie Graesch, a scientist with BASF, who will help her cover today's nematode production methods and the pros and cons of each, along with some solid basics on using nematodes—various species, target pests, formulations, application methods and the latest research. If you want to use nematodes to control western flower thrips, fungus gnats and shore fly, you'll want to attend this free webinar!
