Ball Publishing Webinar: Fiber Pots: Can You Really Grow and Sell in Them?

6/9/2020 - 6/9/2020

1:00 PM Eastern/12:00 PM Central

In this free webinar, HCâ€™s Bryce Anderson, a fiber pot specialist for more than a decade, will share the details about what makes their EcoGrow Organic Growing Container special, and heâ€™ll give you the details of trials done by real growers in the real world. Bryce will talk about growing environments, irrigation needs, performance, degradation and retail sales so you can determine if fiber pots are the right solution for your operation. They are an excellent option for anyone looking for an ecological or even organic solution to their container needs. As a bonus, youâ€™ll have the opportunity to request a FREE Sample Kit of EcoGrow products at the end of the webinar.
