

UNH Cooperative Extension Landscape and Greenhouse Team Webinar Series: Silicon as Plant Beneficial Nutrient: Improving Plant Growth and Plant Health

3/30/2021 - 3/30/2021

12:00 - 1:00 PM Eastern/ 11:00 AM - 12:00 PM Central

Every Tuesday February 2nd to March 30th, the UNH Cooperative Extension Landscape and Greenhouse Team is hosting Plant Production lunch time webinars. One pesticide credit will be available for each of the talks. In this webinar, Dr. Muhammad Shahid, Associate Professor Extension/State Specialist Greenhouse and Nursery Production at University of New Hampshire will discuss beneficial effects of silicon, formulations, commercially available products and silicon application methods.
