

UNH Cooperative Extension Landscape and Greenhouse Team Webinar Series: Enhancing Efficacy, Crop-safety and Sustainability in Production Systems: What's new in the weed management toolbox?

3/16/2021 - 3/16/2021

12:00 - 1:00 PM Eastern/ 11:00 AM - 12:00 PM Central

Every Tuesday February 2nd to March 30th, the UNH Cooperative Extension Landscape and Greenhouse Team is hosting Plant Production lunch time webinars. One pesticide credit will be available for each of the talks. In this webinar, Dr. Ramdas Kanissery, Assistant Professor/Weed Biologist at University of Florida will discuss precision placement of herbicides, novel fumigation strategies and non-chemical techniques like the steam application as weed control approaches for enhancing efficacy, crop-safety and sustainability in production systems.
