Controlled Environment  
Agriculture Center

University of Arizona's Greenhouse Crop Production & Engineering Design Short  
Course

3/10/2021 - 3/10/2021

Online event

This three-day online conference (March 3, 10 and 17) will cover everything from technology trends and greenhouse structures to plant nutrition, pest control, lighting and urban ag. This year they'll also dive into hemp, mushrooms and organic hydroponic production.
